VINCI wins a contract to build a residential and office complex in Malaysia

Wangsa Tegap, a wholly owned subsidiary of Berjaya Corporation, has awarded VINCI Construction Grands Projets (70%, leader) and Hitachi (30%) a contract to build the first phase of the Berjaya Central Park residential and office complex in Kuala Lumpur, Malaysia.

This first phase, valued at €76 million, comprises the turnkey construction of a 9-storey podium block and a 46-storey office tower as well as the structural construction of a 48-storey Ritz Carlton residential tower. The complex will have a total area of 185,000 sq. metres.

Work will begin immediately and take 27 months to complete.

In 2003, VINCI Construction Grands Projets built the 700,000 sq. metre Berjaya Times Square complex, Asia's largest residential and shopping complex in a single phase, for the same customer in Kuala Lumpur.
