Press Release

ASF and VINCI Concessions sign a cooperation agreement

The ASF company, in which the French State is the majority shareholder, and the VINCI Concessions company, a VINCI subsidiary which holds a 20% interest in ASF, have just signed a framework cooperation agreement. The document defines the areas in which there are prospects for joint activities. It primarily covers:

- development of common products and services (means of payment, provision of information and sales offers such as season tickets), especially for customers of Vinci Park car parks and customers of the ASF Group networks,
- development in France of truck parking areas to meet the strong demand for secure parking from road transport companies,
- submission, on a case by case basis, of common bids on calls for tender outside France in the area of concessions and operation of roads.

ASF and VINCI Concessions, already prequalified as part of a broader consortium for the concession management of the Chicago Skyway urban motorway, have just been prequalified in the bidding for the A 41 motorway concession between Annecy and Geneva.

With the signature of this agreement, ASF and VINCI Concessions, major players on the French and European concessions market, are paving the way for a cooperation framework within which specific activities can be initiated for the mutual benefit of the two groups and for the benefit of their customers.
