Press Release

Eurovia (VINCI Group) consolidates its industrial positions in Canada

Eurovia, via its subsidiary DJL, has just acquired the operating assets of the Canadian Les Constructions et Pavages Continental Inc. company, based in the Mauricie region half way between Montreal and Quebec. These assets are made up of two coating plants, a crushing plant and a dozen quarries and sand pits representing 45 million tonnes of materials, a 90-year reserve at the current rate of production.

This acquisition, which generates annual net sales of some €18 million, enables Eurovia to extend its industrial and commercial business activity to an expanding region where it had not previously operated.

Eurovia, via its subsidiary DJL, generates €110 million in road infrastructure construction and maintenance in Canada.

Eurovia, a VINCI Group subsidiary, is a world leader in roadworks. Operating in 16 countries through 330 works entities and 800 industrial production sites and with a workforce of 37,000, Eurovia generated net sales of €6.5 billion in 2005.
