VINCI Airports wins the concession of Manaus airport and 6 other airports in Brazil

- Seven airports which welcomed almost 4.7 million passengers in 2019, including 3 million at Manaus international airport
- Crucial mobility and connectivity infrastructures for the country
- Strong environmental agenda

On completion of a call for tenders initiated by ANAC (Agência Nacional de Aviação Civil), VINCI Airports was today awarded a 30-year concession for seven airports of the North region of Brazil: Manaus, Porto Velho, Rio Branco, Boa Vista, Cruzeiro do Sul, Tabatinga and Téfé.

Gateway to the Amazon region and neighbouring Brazilian states, these airports welcomed 4.7 million passengers in 2019. They are essential for opening up a vast region of 3.8 million km².

In addition to ensuring the operations, maintenance and modernization of terminals and runways, VINCI Airports will also transform these airports into eco-efficient infrastructures:

- net-zero emissions goal,
- set-up of photovoltaic farms,
- waste and water management,
- establishment of biodiversity laboratories,
- carbon sinks projects with local NGOs.

To do this, VINCI Airports will build on the successful environmental policy it has been successfully implementing since 2018 at Salvador Bahia airport in North East Brazil.

VINCI Airports also intends to support Brazil's post-pandemic economic recovery, by developing the passenger traffic and the cargo activity at Manaus, 3rd largest cargo airport in Brazil. Pillar of the economic and community development of the Amazon region, Manaus plays a key role in the country's economy, in particular for the high growth electronics industry.

VINCI Airports, whose global network is thus extended to 52 platforms, strengthens its presence in lusophone countries and Latin America, where it will manage a total of 16 airports in Brazil, Chile, Costa Rica and the Dominican Republic.

"Our roadmap is clear: green airports for green growth. In this remote region where air transport is essential, VINCI Airports will make these airports more resilient, and eco-efficient, in order to sustain economic recovery in Brazil, while preserving the planet. We are eager to start operations, together with Brazilian authorities and local communities", declared Nicolas Notebaert, CEO of VINCI Concessions and President of VINCI Airports.

About VINCI

VINCI is a global player in concessions and construction, employing more than 217,000 people in some 100 countries. We design, finance, build and operate infrastructure and facilities that help improve daily life and mobility for all. Because we believe in all-round performance, we are committed to operating in an environmentally, socially responsible and ethical manner. And because our projects are in the public interest, we consider that reaching out to all our stakeholders and engaging in dialogue with them is essential in the conduct of our business activities. Based on that approach, VINCI's ambition is to create long-term value for its customers, shareholders, employees, partners and society in general. www.vinci.com
