VINCI Autoroutes and VINCI Airports traffic in May 2023

I- Change in VINCI Autoroutes' intercity networks traffic

	May	YTD at the end of May (5 months)
	% change 2023/2022	% change 2023/2022
VINCI Autoroutes	+3.8%	+2.7%
Light vehicles	+5.0%	+3.5%
Heavy vehicles	-3.9%	-1.7%

The trends observed in May principally reflect calendar effects. Light vehicle traffic – which was particularly vigorous – was boosted by the several long weekends. Heavy vehicle traffic, on the other hand, declined because there were two fewer working days (without this effect, it was higher in May 2023 than in May 2022).

Overall, VINCI Autoroutes' traffic has remained on a positive trend over the first five months of the year.
