

VINCI wins a contract to modernise a dam near Brisbane in Australia

RAISING
THE DAM'S
CREST
HEIGHT

WIDENING
THE CONCRETE SPILLWAY

UPGRADE
TO ACCESS
ROADS

2024
START OF WORKS

A PROJECT WORTH OVER

€ 86 M

Benefits:

- Increase flood capacity and resilience of infrastructures.
- Guarantee the viability of the dam by incorporating standards of resilience to extreme climatic events.
- Recycling materials for the construction of the wall and taking biodiversity into account by encouraging the natural migration of fish.
