VINCI wins a contract for a data center in the Iberian Peninsula

- Construction of a cooling plant for a major data center campus
- A €165 million contract value
- Strengthening the Group's position in the digital infrastructure portfolio

Cobra IS has been awarded a new contract for the construction of a cooling plant for a major data center campus in the Iberian Peninsula.

The project, a €165 million contract value, includes the delivery of mechanical, electrical, and plumbing (MEP) installations for 126 dry coolers. They will cool the equivalent of 200 MW of computing capacity and play a critical role in keeping the campus operating reliably.

Cobra IS is currently in the process of bidding for further phases of this data center campus worth several billion euros in total.

This new contract further reinforces VINCI's position as a strategic partner for the delivery of large-scale digital infrastructure. Driven by increasing demand for artificial intelligence, this market is booming. The VINCI Group aims at playing a key-role in this market, especially in France and some Asian countries.

VINCI's revenue in the digital infrastructure market was €7 billion in 2025.

About VINCI

VINCI is a world leader in concessions, energy solutions and construction, employing 294,000 people in more than 120 countries. We design, finance, build and operate infrastructure and facilities that help improve daily life and mobility for all. Because we believe in all-round performance, above and beyond economic and financial results, we are committed to operating in an environmentally and socially responsible manner. And because our projects are in the public interest, we consider that reaching out to all our stakeholders and engaging in dialogue with them is essential in the conduct of our business activities. VINCI's ambition is to create long-term value for its customers, shareholders, employees, partners and society in general. www.vinci.com
