VINCI invests in H2 MOBILITY

- Leader of hydrogen stations in Germany
- Supporting the development of hydrogen mobility
- Closing of the Clean H2 Infra Fund

VINCI Concessions announces that it has participated in the latest financing round of H2 MOBILITY, raising €10 million alongside the Clean H2 Infra Fund, the world's first low-carbon hydrogen fund.

H2 MOBILITY is the leader of hydrogen refueling stations for road mobility in Germany, with more than 90 stations in operation and the ambition to expand its network to 300 stations by 2030.

VINCI Concessions intends to support H2 MOBILITY's development ambitions through its subsidiary VINCI Highways, Germany's leading highway concessionnaire with a network of over 200 km in operation.

This investment is part of the VINCI group's approach to developing its activity across the entire hydrogen value chain with initiatives such as the creation of Hyfinity, a business unit dedicated to EPC* low-carbon hydrogen projects, or the taking stake in Genvia, a company developing high-performance electrolyzers for the production of low-carbon hydrogen.

Besides, VINCI is one of the key industrial investors of the Clean H2 Infra Fund – managed by Hy24 – which is celebrating its closure today at an event attended by representatives of its main investors, including Xavier Huillard, Chairman and CEO of VINCI
